President's address

Welcome to OECI Oncology Days 2018

The annual convention of the Directors of the European Cancer Centres and Institutes is hosted in Poland for the first time. This year is a major milestone event for the OECI as it is the celebration of the OECI's 40th Anniversary since the very first meeting of the Directors of some of the main European Cancer Centres back in 1979.

Our Anniversary is saddened by the premature and unexpected passing of Professor Thomas Tursz, former Director of the Institut Gustave Roussy. Thomas covered the position of OECI President from 2002 to 2005, launching the Accreditation and Designation Programme as a main instrument to certify the quality of European Cancer Centres.

Thomas was a combination of a great scientist and a good clinician, as well as an outstanding medical director. Leader of French cancer care and loved person that always privileged the group over the individual, he inspired with his work a whole generation of oncologists. We will miss him dearly and we want to dedicate the 40th Meeting of the OECI Directors to this generous and outstanding member of our community.

We will remember him with his smile and jokes that always cheered up our social events.

2018 is the transitional year of my presidential mandate and Professor Thierry Philip will be taking over the Chair of OECI, with the intention of carrying forward the running activities and leading our Organisation towards new challenges and achievements, promoting multidisciplinary, integration and quality in the organisation of our Cancer Centres.

Thanks to the dedicated and assiduous support of the OECI Offices and the Board Members, during the four years of my Presidency, OECI has developed a more solid and federated organisational structure. This has given us the possibility to better reach our goals through inclusivity, and to involve more members to interact and establish partnerships with other like-minded Organisations, which share a common vision. An open and transparent interaction amongst all the main cancer actors is a mandatory pre-condition, justifying our efforts and confirming that we are committed to serve our patients and the progress of science.

A Cancer Centre is the central place where multi-disciplinary is implemented and the OECI Cancer Centres represent the advanced front of innovation, the place where research and applications are studied and approaches of care are compared, with a view to offering patients the best options for therapy and well-being.

The annual meeting represents an ideal setting for holding a productive exchange of views and I invite you to make the most of this meeting and the relaxed and confidential atmosphere of the social events we have organised for our participants to discuss common strategies.

Again this year, we decided to leave space in our programme for all our Working Groups to also meet, in addition to the Directors of our Centres/Institutes, and other stakeholders working in different sectors, giving them the opportunity to draw upon results already obtained or to pursue further collaboration for the achievements of their goals.

The increase in survivorship has also reinforced the issue of patient rights to access a dignified and active life in society, during and post illness, on top of the best options for cure and therapeutic solutions. After my Presidency, I will continue to chair the WG on Collaboration for Good Practices with Patients and I will have more time to dedicate to the actions we are currently developing in order to strengthen our relationship with patients, demonstrating how they are at the centre of all our efforts.

It has been a great honour to serve as your President for the last four years. The OECI is a unique and essential Organisation for the development and recognition of all the hard work done by all the professionals in our Cancer Centres.

I wish you a pleasant stay in Poznań and very constructive interactions during these OECI 2018 Oncology Days!

Dominique de Valeriola
OECI President

THE 40TH OECI ANNIVERSARY: WELCOME TO POZNAŃ

The year 2018 marks the 40th Anniversary of the founding of the Organisation of European Cancer Institutes (OECI).

The OECI 40th Anniversary is held in Poznań, Poland, from June 20th to June 22nd in collaboration with the Greater Poland Cancer Centre (GPCC). In honour of the 40th OECI Anniversary, the "2018 OECI Oncology Days" covers a range of topical issues in oncology. In particular the 2018 OECI Scientific Conference "Emerging technologies in therapies against cancer: what best to select for cancer centres?" focuses on the most relevant technologies for cancer patients and cancer treatment centres.

The proposed Sessions include many of the hottest topics in oncology, including "Limiting invasiveness of radiotherapy", "Debating the future of Hadrontherapy", "Minimally-invasive technologies", and "Analysis of economic issues for emerging technologies in health care".

Poznań is a charming university city and we are certain that participants will enjoy the opportunity to explore the City, especially the historic old town. Participants are encouraged to take a tour of our facilities at the GPCC, which is, coincidentally, celebrating this year its 65th Anniversary.

We believe that the university atmosphere of Poznań, together with the long medical tradition in our City, will provide an excellent setting in which to exchange knowledge and to discuss important issues in oncology. The Oncology Days will also provide an excellent opportunity to meet old friends, as well as to make new friends and new scientific contacts.

The GPCC is truly honoured to be hosting both the 40th OECI Anniversary and the 2018 Oncology Days.

On behalf of the OECI and the GPCC, we look forward to seeing you in Poznań.

Prof. **Julian Malicki**
Director of the
Greater Poland Cancer Centre
in Poznań

The OECI is a non-governmental, non-profit Organisation founded in Vienna in 1979 and remodelled in 2005 into OECI-EEIG, a European Economic Interest Grouping, headquartered in Brussels.

Today, the OECI counts 82 Member Institutes, which include some of the most prominent European Comprehensive Cancer Centres.

The OECI is a network of cancer Institutions established to create a critical mass of expertise and competences and contributing to the production and dissemination of knowledge, so as to reduce fragmentation and increase competitiveness. These goals are being achieved by promoting and strengthening the concept of "comprehensiveness", supporting quality in cancer care also through a well-structured internal organisation.

OECI aims to accelerate the production and application of personalised care approaches, and to ensure equal rights to all cancer patients, with the ultimate goal of finding new and better treatments, providing more comprehensive care and improving patient quality of life, through evidence-based medicine.

The increasing interest from international organisations, stakeholders & the cancer community in the OECI points to the growing importance of a comprehensive cancer network of institutions, where the entire chain of cancer care provision is present.

The dissemination of the OECI activities, reports, proceedings are publicised through the OECI website at <http://www.oeci.eu> and [ecancermedicalscience](http://www.ecancer.org), the Official OECI e-Journal at <http://www.ecancer.org>

The main OECI events are also announced on Cancerworld and on Tumori Journal.

Director's foreword

Our Institution uses the most advanced therapeutic methods in the fight against neoplastic diseases with the hope of restoring patients to health while fully respecting their dignity.

Description of the Centre and history

The Greater Poland Cancer Centre was established in 1953 and is one of the largest oncology centres in Poland and in Europe. The centre provides medical service in the field of oncological surgery, head and neck cancer surgery, radiotherapy, chemotherapy, gynaecological oncology, anaesthesiology, brachytherapy, and diagnostics. Over 20,000 patients are admitted to the hospital each year, and more than 6,000 surgical procedures and 6,500 radiotherapy treatments are performed annually.

Main research activities

The centre's primary research activity involves clinical studies, such as the high profile clinical trials Hypoport and Cyberprost for prostate cancer and the HIOB trial for intraoperative breast radiotherapy. EORTC lines of investigation include the following: the origin of ovarian cancer; HPV infection in head and neck cancer; contributions to the cancer genome atlas; the physics-related and biological processes during radiotherapy; the effect of cytostatic agents and ionizing radiation on cancer cells; and molecular imaging in radiation therapy planning.

Core facilities

Following the European model, interdisciplinary teams provide a comprehensive care according to cancer localisation in the body. These multidisciplinary teams work closely together to treat patients with cancers in a given location, such as the breast, the upper digestive tract, or the head and neck area. These teams are mainly led by physicians from various specialisations (e.g., surgery, radiation oncology, medical oncology) in addition to psychologists, physical therapists, nurses, and other supporting personnel (e.g., social workers or dieticians).

Education

WCO has established a Teaching and Conference Centre, which aims to serve the needs health care personnel, patients, and medical students from the Poznań University of Medical Sciences as well as other universities have. Additionally, a variety of training courses, scientific conferences, and symposia are organised each year for both Polish and foreign physicians and other health care professionals.

The Greater Poland Cancer Centre is also home to the editorial offices of four international scientific journals:

- 1) Reports of Practical Oncology and Radioterapy,
- 2) Letters in Oncology Science,
- 3) Contemporary Oncology
- 4) Journal of Contemporary Brachytherapy.

OECl Pathology Day Development of Clinical Cancer Research

June 20th
IBB Andersia Hotel

Girona Hall

There has been a recent development in oncology that has led to the application of clinical research methods directly to patients under treatment. This is a result of the fact that our knowledge of cancer biology and the sophisticated analytical methods used, go beyond the usual randomisation process performed in clinical trials. Indeed, recent literature has shown that individual tumours, within a particular type of cancer, often exceed the most up-to-date molecular classification, and the limits between distinct cancer types. This has recently led to new approaches such as basket, umbrella and platform studies, and to the suggestion of N-1 trials, as already discussed in the meeting held in Brno last year.

A necessary prerequisite to this type of clinical studies is the possibility to exchange reproducible analysis results among institutions. The update of the OECl accreditation standards is strongly related to the need to guarantee reproducible investigations. For the above reasons it is mandatory to continue the already started process of standardisation and guideline definition on analytical methods to be adopted, taking also into consideration new molecular morphology approaches.

Supportive and Palliative Care Working Group Session

June 20th
IBB Andersia Hotel

Room Ibiza

A survey of palliative care services in OECI certified Centres

The meeting aims to present, discuss and launch a survey on how supportive and palliative care is organised in all the OECI certified Centres, standardising the approaches at European level.

The survey will be the basis on which to realise a reference document for cancer patients and European cancer Centres/Institutes on a common view of supportive and palliative care.

15.00-15.20 **OECI Supportive and Palliative Care working group: objectives and future working plan**

Tiina Hannele Saarto

15.20-15.40 **Mission of the Palliative Care Services in the OECI Members. A survey of the present status of Palliative Care in OECI certified Cancer Centres**

Tiina Hannele Saarto

15.40-16.20 **Discussion**

16.20-17.20 **European network of Oncology and Palliative Care Services: a shared vision of modern palliative care of cancer patients**

16.20-16.35 *Matti Aapro*

2. Presentation of the draft standards by section

OECI team

3. Feedback from participants

4. Issues, conclusions and next steps

Simon Oberst

Cancer Outcomes Research Working Group Session

June 20th
IBB Andersia Hotel

Walencja Hall

Feasibility of an OECI collaborative study on cancer outcomes

The rationale of the OECI WG on Outcomes is to try and launch outcomes study involving OECI institutes and relative registries both clinical and population-based in their areas. 25 OECI Members (from 15 EU countries) replied to the 75 questionnaire circulated in 2017 to explore the interest and feasibility to carry out outcome studies. From this survey it emerged that breast (14 centres) and colorectal cancer (11 centres) were most frequently indicated as suitable for outcome studies, possibly focusing on clinical outcomes commonly available through health, hospital registries, or using the information included in the A&D questionnaire.

SESSION 1 Chair: *Milena Sant*

15.00-15.20 **Cancer Outcomes studies and Population based cancer Registries: interest and feasibility among OECI Centres**

Milena Sant

15.20-15.50 **Outcome results from real-life treatment practice for colorectal cancer in Belgium and some European countries**

Dominique de Valeriola

15.50-16.10 **Integration of hospital based breast cancer data and population based data at the Greater Poland Cancer Centre and experiences in Poland with biobanks**

Maciej Trojanowski

16.10-17.40 **Panel of discussion on the feasibility to implement one / two pilot studies and how to finance them**

Chair: *Josep Borrás*

Discussants: *Giovanni Apolone, Otto Visser, Tanja Marinko, Maja Ebert Moltara, Kaire Innos, Maria José Bento and other WCO representatives*

17.40-18.00 **Conclusions and next steps**

AIMS

1. to define a short list of 2 /3 easily clinical indicators for studies (initially) on breast and/ or colorectal cancers
2. to formalise the availability from a group of OECI Members to start with a pilot
3. to agree on a "NEXT STEP TIMELINE"

The discussion will touch on the following issues:

1. Availability of clinical records in the participating centres
2. Availability of a database to be used for extraction purposes
3. Possibility of record linkage with external sources to obtain the patients' life status and also with external sources to obtain information on treatments and hospitalisation from other centres in the country
5. Availability of disease phase (first diagnosis, recurrence / progression of the disease)
6. Availability of number of patients only partially treated in the center

Scientific Conference

Emerging technologies in therapies against cancer: what best to select for cancer Centres?

June 21st

IBB Andersia Hotel

Girona Hall

09.00-10.20 **Session 1**

Limiting invasiveness of radiotherapy

Chair: Guy Storme

09.20-09.40 **Radiotheranostics**

Patrick Flamen

09.40-10.00 **Image-guided and innovative radiotherapy**

Piotr Milecki

10.00-10.20 **IORT in rectal cancer**

Olga Sousa

10.20-10.40 Coffee Break

10.40-12.00 **Session 2**

Debating the future of hadrontherapy

Chair: Roberto Orecchia

11.00-11.20 **Is there a bonus for patients undergoing hadrontherapy so far?**

Guy Storme

11.20-11.40 **9 years experience with protons and 20 years with carbon ions**

Klaus Herfarth

11.40-12.00 **The Italian experience and the CNAO facility**

Roberto Orecchia

12.00-13.20 **Session 3**

Minimally-invasive technologies: pros and cons

Chair: Julian Malicki

12.20-12.40 **Endoscopic approach of the solitary pulmonary nodule in 2018**

Dimitri Leduc

12.40-13.00 **Image-guided treatment**

Theo Ruers

13.00-13.20 **Head & Neck robot assisted surgery**

Wojciech Golusinski

13.20-14.20 Lunch

Scientific Conference

Emerging technologies in therapies against cancer: what best to select for cancer Centres?

June 21st

IBB Andersia Hotel

Girona Hall

14.20-15.40 **Session 4**

Health economic issues on emerging technologies

Chair: Wim H. van Harten

14.40-15.00 **How do health systems decide on investing in innovative technologies in cancer?**

Josep Borrás

15.00-15.20 **Cost effectiveness on scenarios of introducing image-guided surgery**

Valesca Retel

15.20-15.40 **Cost effectiveness and decisions on Proton Beam Therapy**

Alejandro Mazal

15.40-16.00 **General Discussion**

Collaboration for Good Practices with Patients (CGPP) Working Group Session

June 21st
IBB Andersia Hotel

Girona Hall

Expanding patient involvement in quality improvement

Quality improvement in cancer care and research is a major goal shared by both health care professionals and patients. Today, some innovative cancer centers are taking initiatives, involving patients, and leading the way forward to achieve this objective. In this session, different strategies of patient involvement and different examples of current collaborations between cancer centres and patient organisations will be presented, illustrating the variety of solutions and potential approaches that could be adopted across Europe.

- 16.00-16.20 **Survey on patient involvement in OECI Centres**
Patrick Miqueu
- 16.20-16.40 **Collaboration with local and national Organisations in Finland: initiatives at the Tampere University Hospital Cancer Centre**
Anne Kairenius and Emmi Toivonen
- 16.40-17.00 **Public and patient involvement in research at the Kings' Health Partners Comprehensive Cancer Centre**
Ambi Williams
- 17.00-17.30 **Discussion and next steps**
Dominique de Valeriola
- 17.30 **End of the meeting**

Accreditation & Designation Board Meeting

June 21st
IBB Andersia Hotel

Valencia Hall

- 15.00-16.00 **Accreditation & Designation Board Meeting**
Restricted to A&D Board Members

Accreditation & Designation Working Group Session

June 21st
IBB Andersia Hotel

Valencia Hall

- 16.00-17.30 **OECI re-accreditation proposals: how to focus on quality improvements whilst not overburdening Centres**
Chair: Simon Oberst

Discussion by OECI Member Organisations

Theme:

As quality of cancer care in European Centres generally improves, a whole industry of accreditations and certifications is growing, which places an increasing burden on Centres which are developing at different rates. The OECI is committed to quality improvement, and believes that the A&D Programme is a flagship for European Accreditation systems, which needs to remain robust and set high standards. But re-accreditation processes every 5 years need to be nimble and focus on areas of need for improvement, rather than re-auditing well-established systems. This meeting is being called to make draft proposals to member Organisations and gain feedback.

08.00 Registration

08.15 **General Assembly Constitution, welcome and approval of the Agenda**
Dominique de Valeriola

08.30 **Session 1: Administrative and financial matters**
 Chair: *Dominique de Valeriola*

Point 1: Approval of June 2017 General Assembly's Minutes
 (vote requested - decision to be taken at simple majority of the OECI Full Members present or represented)
Dominique de Valeriola

Point 2: Approval of the Financial Statement 2017 and discharge to the Board
 (vote requested - decision to be taken at simple majority of the OECI Full Members present or represented)
José Maria Laranja Pontes

Point 3: Proposal of modification of OECI yearly membership fees
 (vote requested - decision to be taken by unanimity of the OECI Full Members present or represented)
Dominique de Valeriola

Point 4: Proposal of modification of the Article 6.2 of the OECI Statute - Associate members
 (vote requested - decision to be taken by simple majority of the OECI Full Members present or represented)

Point 5: OECI 2018 and 2019 Provisional Budgets
 (vote requested - decision to be taken by simple majority of the OECI Full Members present or represented)
José Maria Laranja Pontes

Point 6: OECI Board composition
Dominique de Valeriola

6.1 Board composition for the coming years
 (vote requested - decision to be taken at simple majority of the OECI Full Members present or represented)

6.2 Hand-over of the 2014-2018 Presidency, and transfer of powers to the 2018-2021 Presidency
 (vote not requested)

Point 7: Working Groups and Co-opted Board Members update
 (vote not requested)
Thierry Philip

Point 8: New applications for membership
 vote requested for full membership - decision to be taken by unanimity of the OECI Full Members present or represented; for associate membership - decision to be taken by simple majority of the OECI Full Members present or represented
Claudio Lombardo

Point 9: Oncology Days for the coming years
Thierry Philip

CEREMONY FOR THE DELIVERY OF THE
